

Learn vs Turnitin Assignment

When using Learn, staff have the option of two different assignment tools that can be used for submission, marking and returning grades. The Learn assignment tools and the Turnitin Suite are similar but not identical in their functionality.

If an assignment requires originality reports we would advise staff to use the Turnitin suite as this is the only tool that has this functionality. Please be aware that originality reports can't be created for images (eg. scanned work) and are not always appropriate depending on the assignment type (eg. Matlab code).

	Learn	Turnitin
Group assignments	✓	
Delegated marking	✓	
Multiple anonymous grading	✓	
Multiple markers	✓	
Moderated marking	✓
